**Mongolian Delegation visits TerraX Mineral's Yellowknife City Gold Project
to Study Model of Exploration at Request of Global Affairs Canada**

TerraX Mineral's Yellowknife City Gold Project is the "go to" company and project for the Governments of Canada and the NWT when they want to show off Canada's northern exploration industry.

The Mongolian delegation visited Canada to study models for promoting economic growth in Mongolia by strengthening their public institutions to grow the mining sector and ensure local benefits. The group is seen here at the TerraX Core Processing Facility at the Yellowknife Airport.
